

Global Payments and PayPal®

Teaming up for powerful electronic payment processing

Global Payments brings a trusted name and an industry-leading suite of eCommerce payment solutions to merchants of all sizes. In partnership with PayPal, Global Payments proudly offers Payflow Link and Payflow Pro; two fast, convenient, and secure options for accepting electronic payments on a Web site. Merchants simply choose the solution that best fits their volume and transaction needs.

Payflow Link is designed for merchants who are just getting started selling on the Web. This service allows merchants to process payments by simply adding a small piece of HTML code that links a customer from the merchant site to the hosted solution. Payflow Link is a fast, easy, low-cost solution for accepting payments securely and reliably via the Internet. This solution provides back-end connectivity to all leading payment processing networks and allows merchants to support various payment instruments, including all major credit cards, debit cards, and electronic checks. Payflow Link requires no additional Web site development, making implementation fast and painless. By simply adding an HTML hyperlink to their existing Web sites, merchant enable their consumers to connect to a secure order form, hosted by PayPal. Merchants can use the order form to automate order acceptance, authorization, processing, and management of transactions. Payflow Link provides industrial-strength online payment processing capabilities with minimal capital and administrative requirements.

Scalable and fully customizable, **Payflow Pro** is recommended for merchants who require peak site performance and direct control over payment functionality. This SSL TCP/IP-enabled messaging agent controls communications between an application and the Payflow Platform. With Payflow Pro, merchants gain direct access to the PayFlow processing API network service and back-end connectivity to all leading payment processing networks. This robust solution enables the merchant Web site to accept multiple payment types, including credit cards, purchasing cards, debit cards, and electronic checks for maximum end-user convenience and greater revenue opportunities. Payflow Pro uses digital certificate technology to securely pass transaction data to PayPal's payment servers for maximum end-user protection. Payflow Pro is the ideal product for merchants requiring customizability and scalability in an online payment processing solution.
