- Supports credit, debit, EBT and check services
- Card-Not-Present (CNP) processing
- Clerk entry and reporting

TERMINAL SOLUTIONS

Retail – HyperWare® 8-BIT

FULL SUPPORT FOR HYPERWARE RETAIL APPLICATION FROM HYPERCOM®

Retail – HyperWare 8-BIT is a full-featured terminal product providing credit (consumer and commercial), debit, EBT and check processing for the retail market. Targeting a variety of retailers, Retail – HyperWare 8-BIT provides complete payment processing in a single terminal.

Designed to enhance ease-of-use, this application utilizes menu displays for simplified access to transactions, reports and other product functions, minimizing training time and reducing help desk calls. In addition to all standard retail functions and reports, specialty functions such as unattended auto-settlement and quasi-host based settlement raise the level of performance to an all-time high.

Global Payments offers complete 24-hour, 365-day-a-year support by Global Payments' trained help desk specialists.

FEATURES	BENEFITS
Unattended auto-settlement option	Allows daily funding with optional automatic unattended settlement of both card and check transactions
ACH check	Improves cash flow, minimizes reconciliation efforts, reduces bank fees and eliminates returned checks
Check guarantee	Provides the coverage and protection needed to accept check payments without risk
Check verification	Cost effective protection against check fraud and associated losses
Large transaction capacity (300+ per terminal)	Large transaction capacity increases efficiency by minimizing the number of settlements
Optional American Express® Reverse PIP processing	Authorization and settlement directly with American Express lowers merchant's processing costs
