Giving your customers an easy to reach payment point

INGENICO iPP350 Series PIN Pad

The Ingenico iPP350 PIN Pad is the perfect PIN Pad for everyday use.

It adds ease of payment and eliminates the requirement to pass the terminal back and forth. The PIN-Pad can be kept in a fixed position in easy reach of customers, increasing convenience and providing a better customer experience. The iPP350 is used for till integrations via our Global POS Link solution.

The PIN-Pad reflects what's input onto the EPOS and will allow Chip and PIN, Contactless or swipe transactions. When completing a transaction no additional input is required to bring the PIN-Pad to life. The transaction messages are simply mirrored from the EPOS.

The iPP350 offers a colour screen and its smart design includes integrated Contactless for processing ultra-fast lower value payments (up to the Contactless limit±). The iPP350 also supports Higher Value Payments (Wallet Payments) as standard.

Key Benefits

- Easy to use with a full set up guide
- Quick payments as the terminals allow transactions to be paid directly into your bank account within three working days
- No additional rekeying of transaction details, increasing speed of service and reducing errors
- No additional End of Day reconciliation for the PIN Pad as this is driven by the EPOS or terminal
- Brand promotion opportunities on the PIN Pad display
- Supervisor password (not card)

Device Specifications

Size: 168mm (L) x 83mm (W) x 40mm (H)

Weight: 267g

The PIN-Pad comes with a 2 metre connector cable

Key Features

- Fully compliant with Payment Card Industry PIN Transaction Security (PCI PTS)
- No card data is shared by the PIN Pad with the till, easing your journey to compliance
- Transactions are stored and processed securely end-to-end
- Integrated Contactless
- Seamless NFC (Near Field Communication) payments (digital wallets/payments)

Approved Card Schemes

Technical Information

- Transaction data encrypted between terminals and Global Payments host system for security
- Broadband compatible providing you with a faster, more secure method of processing
- Standard telephone socket required within a 3 metre radius of terminal or RJ45 network (standard Ethernet) connection if using broadband
